

## Price List July 2020

The following is a guide to approximate prices for Car and Motorcycle parts. Aqua Blasting is a slow process. The cleaner the part is, the less time the process will take. If the part is dirty, stained or corroded, it will cost more. If the part is clean, it will cost less. Larger and complex parts, such as engine blocks are priced via quotation. All parts need to fit in the machine – i.e. inside a 1m\*850mm\*850mm box.

### Motorcycle – Single Cylinder

1. Cylinder Head – \$50
